

# PRESS RELEASE

Athens, 3 – 7 October 2006

## DEFENDORY INTERNATIONAL 2006

The Minister of Defence, Mr E.Meimarakis informed from the President of EAS S.A.(PYRKAL–EBO), Mr.D.Fintanidi as well as from the President of Tropical S.A, Mr. G. Lagios, for the cooperation of TROPICAL S.A. with EAS S.A. (PYRKAL – EBO)

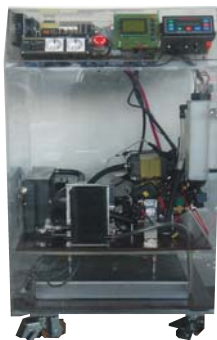

The International Exhibition DEFENDORY 2006 took place in Athens from the 3<sup>rd</sup> to the 7<sup>th</sup> of October 2006 participating hundreds of organizations from Greece as well as from all over the world presenting interesting products for defensive armament. On this exhibition, EAS S.A. (PYRKAL – EBO) was also participating and presented noteworthy and innovative products that are related to the Renewable Energy Sources and the Hydrogen Technologies. Great impression has made to the visitors showed the hydrogen fuel cell power generator which was operated constantly during the exhibition.

Also, great interest was shown from officers (army, navy, air forces, etc) from Greece as well as from Foreign countries that visited the exhibition for the fuel cell power generator HT-1000 that uses as fuel natural gas.

The stand of EAS S.A. was visited from the Minister of Defense, Mr E. Meimarakis and it was thoroughly informed from the President of EAS S.A. (PYRKAL – EBO), Mr. Fintanidi as well as from the President of Tropical S.A, Mr. G. Lagios, for the cooperation of TROPICAL S.A. with EAS S.A. (PYRKAL – EBO) which lead to the development of a portable fuel cell power generator which uses hydrogen as a fuel and it can be used into the Greek Armed Forces as power generators since they are noiseless and with zero emissions.

The stand was also visited by the Deputy Minister of Defense. Mr. B. Michaloliako as well as from high rank employees and officers of the Ministry of Defense which of course have been informed for the hydrogen technologies and the hundreds of applications that can have.

### PRODUCTS OF TROPICAL S.A. & EAS S.A. AT DEFENDORY-INTERNATIONAL 2006

The cooperation between Tropical S.A. and EAS S.A. (EBO – PYRKAL) lead to the development of a portable power system which uses hydrogen as a fuel. This power system provides solution to the powering demands for military applications, special vehicles, houses, etc.

Type: EAS-1000

Power: 1kW (made to order up to 20kW)

Voltage: 12 or 24 or 72VDC, 110/230VAC

Fuel: Hydrogen 99.99% (Tank: 5Nm<sup>3</sup> – 5.000lt)

The cooperation between Tropical S.A. – ELBIO S.A. and EAS S.A. (EBO – PYRKAL) lead to the development of a power system which uses natural gas as a fuel. This power system provides solution to the powering demands for military applications, special vehicles, houses, etc.

Type: HT-1000

Power: 1kW (made to order up to 20kW)

Voltage: 12 or 24 or 72VDC, 110/230VAC

Fuel: LPG, Natural Gas, Propane
