

# PRESS RELEASE

Athens, 29<sup>th</sup> of April 2009

**“HANNOVER FAIR 2009, April 20-24”**  
15<sup>th</sup> Annual Group Exhibit Hydrogen + Fuel Cells

At its booth, Tropical, presented the all new 500W air cooled hydrogen fuel cell power generator, named TB-500

Chairman of Tropical, Mr. Lagios in front of Tropical's booth and beside the new hydrogen fuel cell power generator TB-500

Director of Tropical's Hydrogen & Fuel Cell Department, Mr Kaplanis (on the right) together with Mr Lagios (on the left), discussing about a possible strategic partnership

Mr. Kaplanis (on the right) and Dr. Klaus Taube (on the left) from GKSS Research Institute are discussing about their common European Research Project on Metal Hydride Storage Systems

Tropical S.A. participated for one more year at the **15<sup>th</sup> Energy + Hydrogen + Fuel cell International Fair** which was held at Hannover, Germany from the 20<sup>th</sup> to the 24<sup>th</sup> of April. Tropical presented on operation it's all new revolutionary **500W hydrogen fuel cell power generator, TB-500**, which achieved positive feedbacks because of its noiseless operation and for producing zero emissions.

The air cooled fuel cell power generators with power range from **500Watt to 3kW are specially designed to be used as UPS or as back-up power systems** with thousand of applications, such as telecommunication stations, caravans, remote area houses, signalling & sensing, motor yachts, fire watch and alarm cameras / systems, etc

During the Fair, several meetings as well as discussions took place and some strategic partners were established especially on the peripheral's side of the fuel cell systems. Last but not least, several meetings had as main discussion the reselling of our products and especially the full range (500W to 3kW) of the TB Series Fuel Cell Systems establishing sales networks on their countries.
